# FRITZ 13 - DUE OUT 17/10/11

"Let's Check" is the revolutionary new feature of Fritz 13. With it Fritz 13 users can join a worldwide community that will put together a giant knowledge base for chess. Whenever you analyse a position to any meaningful depth with any engine Fritz 13 will, if you allow it, send the main line and evaluation to a central server, to be shared by all participating users. Soon you will be able to find deep analysis to almost every position you look at – instantly, pre-generated by the finest engines in the world, running on the most powerful machines available. Gone are the days where you would have to wait for your computer to reach substantial depth in order to make sure you are not falling into a trap. You will even be able to see the analysis of different chess engines and compare their results – all without a second of waiting time.

Discover a position! It does not matter whether you are a beginner, a club player or a Super-GM. If you use a powerful engine to analyse a previously unknown position with the *Let's Check* function switched on, you will be automatically registered as the "discoverer" of that position.

Conquer chess positions! *Let's Check* keeps updating the evaluations to any given position with newer, deeper analysis as this becomes available. Using powerful machines

and the latest engines allows you to "conquer" positions, with your name attached to the newest, deepest analysis. You can also add comments to your analysis, which other users will see when they encounter the position.

Even if you are not an openings expert you can become one using *Let's Check*. The entire body of openings theory is built into the system, and *Let's Check* provides you instantly with the statistics of any position in the opening: how often did it occur, which moves were played, with what success. The openings book (LiveBook) is updated on a weekly basis and will show you which variations are currently topical and how good they are. It will also reveal which lines are being analysed and debated in the international community, and with what conclusions.

## Other new features in Fritz 13:

- Enhanced database management
- Improved user interface in Windows
- New and more powerful Fritz 13 engine, especially tuned for deep analysis.
- Updated database and opening book.

**ORDER NOW FOR JUST £40**  
(including free delivery to all UK customers) RRP £44.95

# NEWS AND RESULTS

## KEEPING YOU UP-TO-DATE IN THE COMPUTER CHESS WORLD!

Welcome to another issue of *Selective Search*... no. 157. If your sub. is due for renewal, **please** subscribe again! There will be at least 6 more issues of the magazine!

The label on your envelope shows the number of the last issue you will receive of your current subscription, so it's easy to check that, and also you can make sure it's been updated after you've made a renewal payment!

*I cannot take credit card renewals now, but I have organised a PayPal account for myself (erichallsworth@gmail.com). You can access it at my website and renew your sub. quite easily.*

### SELECTIVE SEARCH

I APOLOGISE that this issue is so late, but I felt it was important to hang on for the **WORLD COMPUTER CHESS CHAMPIONSHIPS** (WCCC + WCSC) to take place and give you the results. These will be on **page 34**. As I write these notes I know that **Junior** won the **World Title** with Hiarc and Shredder 2=, and in the **World Software Championship** **Hiarc** was leading with 2 rounds to go, ½ a point ahead of Junior.

A SINCERE THANKS to everyone who has taken the opportunity to re-subscribe using **PayPal**! I set this up because I don't have access to a credit card facility since my retirement, but PayPal seems to work well, so thank you!

### PAYING YOUR SUBSCRIPTION

For the moment all subscriptions can be paid in the following ways...

- by **cheque**!
- or you can send **cash** through the post but you must register it, or do whatever alternative your country requires for sending cash if you are not in the UK. I know that cheques can be quite difficult for my readers abroad as you have to add an amount of around £10 to include the Bank charges in the UK which apply to foreign cheques even when made out in £ sterling!
- by **PayPal**. If you have a PayPal account you

can use it to send your subscription to [erichallsworth@gmail.com] or, even easier, go to my website **www.elhchess.demon.co.uk** and click on Pay Subscription by PayPal in a central box near the top, read the instructions there and then click on the 'Donate' button!

### CHESS: NEWS SECTION

#### LEIDEN - THE 30TH DUTCH OPEN OCT. 2011

I MENTIONED in our last issue my concern for the **Leiden Tournament** and the fact that the entry list was noticeably small and, in particular lacking in top engines. This followed the **ICGA** ban on **Rybka** which the **CSVN** decided not to abide by! Thus there was a backlash from all the **programmers** who had made the original complaint, and they simply refused to enter.

As it happened Rybka itself didn't enter either after all that, and other engines that fill the top places on rating lists such as the **IPON** list don't enter any tournaments like this or the **World Championship**, presumably because they are clones of (take any 1, 2 o3 from) **Crafty**, **Fruit**, **Rybka**, **Ippolit**, **Ivanhoe**, **Fire**, **Houdini** etc... some of which are probably at least in part clones themselves!

So the **result** looks, I guess, a little strange for the famous **Dutch Open**:

| Pos | ENGINE    | SCORE/7 |
|-----|-----------|---------|
| 1   | PANDIX    | 7       |
| 2   | SPARK     | 5½      |
| 3   | PRO DEO   | 5       |
| 4   | THE KING  | 3½      |
| 5   | SPARTACUS | 3       |
| 6   | ARMINIUS  | 2½      |
| 7   | KALLISTO  | 1½      |
| 8   | GADGET    | 0       |

Congratulations to **Pandix**, scoring 7/7 in any tournament takes some doing, there are so many carefully prepared books helping

Magnus Carlsen  
NOR 2823Vishy Anand  
IND 2817Levon Aronian  
ARM 2807Vladimir Kramnik  
RUS 2791Hikaru Nakamura  
USA 2753Michael Adams  
ENG 2733Nigel Short  
ENG 2698Luke McShane  
ENG 2671David Howell  
ENG 2633

weaker engines get into drawish positions, and such fast PCs that it's not so easy to catch your opponents out any more, certainly not in 7 consecutive games!

### THE LONDON CHESS CLASSIC

THIS BRILLIANT and now, it seems, annual event takes place again this year at the **Olympia Conference Centre** in Kensington, London, from 3rd-12th. December.

**Viktor Korchnoi** will again be present as a guest of honour, there are very many special events, especially for schools and younger players - and by inviting an extra GM this year the LCC has introduced the brilliant idea that each GM will have a 'day off' in which he will become a part of the commentary team for the other games!

The players for the main event, with their latest ratings, are: **Magnus Carlsen** 2826, **Vishy Anand** 2811, **Levon Aronian** 2802, **Vladimir Kramnik** 2800, **Hikaru Nakamura** 2758, **Michael Adams** 2734, **Nigel Short** 2698, **Luke McShane** 2671, and **David Howell** 2633.

### CARL BICKNELL

CARL HAS been playing **Hiarcs13.3** on his iPhone against **Chessmaster GMedition** on a 3.6GHz quad Core i7.

Previously **Hiarcs12.4** on his iPhone had lost 7-3, but now **Hiarcs13.3** has won by an amazing 6-4!

He wonders how well it could do in the London Chess Classic!?!

### THE XVTH CHESS WAR SUPER TOURNAMENT

I ONLY became aware of this Tournament after 32 rounds had been played. These tournaments are run by **Graham Banks** and this time it involved 12 engines in a 4 x All-Play-All (so 44 games each in total) at 40 moves

in 25mins played on an i5 750 PC. The engines were played in 32-bit and SP mode.

When I joined the scores were:

|     |                 |
|-----|-----------------|
| 23½ | Houdini2.0      |
| 22½ | Critter1.2      |
| 19  | Rybka4.1        |
| 18½ | Stockfish2.1.1  |
| 16  | Spike1.4 Leiden |
| 16  | Komodo3         |
| 15½ | Naum4.2         |
| 15½ | Shredder12      |
| 14  | Sjeng 2010      |
| 12  | Chiron1.0       |
| 11  | Hiarcs13.2      |
| 8½  | Junior12.5      |

Not much changed over the next few rounds except that Shredder started to climb the table a little, but at round 38 Houdini was 2pts clear of Critter, and Rybka was now 4pts behind Critter, so the winner would come from the leading pair.

### SUPER TOURNY XV - FINAL STANDINGS

| POS | ENGINE           | SCORE/44 |
|-----|------------------|----------|
| 1   | HOUDINI 2        | 33½      |
| 2   | CRITTER 1.2      | 31½      |
| 3   | RYBKA 4.1        | 26       |
| 4   | STOCKFISH 2.1.1  | 24½      |
| 5   | KOMODO 3         | 22       |
| 6   | SHREDDER 12      | 20½      |
| 7   | SPIKE 1.4 LEIDEN | 20       |
| 8=  | NAUM 4.2         | 19½      |
|     | SJENG 2010       |          |
| 10  | CHIRON 1.0       | 18       |
| 11  | HIARCS 13.2      | 15½      |
| 12  | JUNIOR 12.5      | 13½      |

## FRANK HOLT

FRANK SHARED with us recently the problems he'd been having with his Quad PC, but that a good clean-up had rescued it!

Not so unfortunately. A few weeks later it started crashing again, so got returned to Novatech, the retailer. Their further efforts failed to solve it, so they returned it to the manufacturer ('Clevo'?!). They *'sorted it out'* but back at Novatech they found it still kept shutting down - and not due to over-heating playing chess this time, so it's back with the manufacturer for a new processor and RAM!

Frank is playing chess on his slower Duals but managed to send the following result:

### ENGINE TOURNY - FRANK HOLT. DUAL 1.87GHz

| Pos | ENGINE        | SCORE/12 |
|-----|---------------|----------|
| 1   | HOUDINI 1.5   | 10½      |
| 2   | HOUDINI 1.5A  | 9½       |
| 3   | RYBKA 3 HUMAN | 6½       |
| 4   | HIARCS 12     | 5½       |
| 5   | CRITTER 1.2   | 5        |
| 6   | RYBKA 4B      | 4½       |
| 7   | ZAP ZANZIBAR  | ½        |

That's a very disappointing performance from **Zap Zanzibar**, but it tells you how far the engines have come in the last 3 or 4 years, though the **Hiarcs12** result slightly contradicts that comment with an excellent effort in a tournament that sees **Rybka4** in a surprisingly low placing!

### THE 2011 ANNUAL ACCA INTERNET WORLD COMPUTER RAPID CHAMPS

THIS WAS the 5th running of this Internet Event, but there were no really big names entered, although readers will know of some of them from Chris Goulden's articles.

The **top scorers** are shown at the top of the next column:

| Pos | ENGINE                                                                                                                            | SCORE/10 |
|-----|-----------------------------------------------------------------------------------------------------------------------------------|----------|
| 1=  | PANDIX<br>CHESS THINKER X                                                                                                         | 8        |
| 3   | CHIRON X                                                                                                                          | 7½       |
| 4   | SJENG                                                                                                                             | 6½       |
| 5   | BOBCAT 2x                                                                                                                         | 6        |
| 6   | DARMENIOS                                                                                                                         | 5½       |
| 7=  | HANNIBAL X<br>NIGHTMARE X<br>CRAFTY<br>TELEPATH<br>REDQUEEN CHESS<br>GOLDBAR<br>TORNADO-C<br>GAVIOTA<br>THE BARON<br>AND 5 OTHERS | 5        |

**Pandix** won a play-off against **Chess Thinker**, so wins 2 Tournaments in our NEWS section! Although there were no Rating List table-toppers playing, it is clearly quite strong as we see that **Sjeng** came further down the list and was on an 80-core Cluster while most others were i7 or even i5 processors.

**Chiron** is a newly available commercial program, and is probably also quite strong, so in our next issue I will try and have a look at a couple of games involving **Pandix** and **Chiron**.

**The Baron's** score was probably a disappointment, it usually does well even amongst top company but, of course, in a 10 round Event a bit of good luck or bad luck can play a big part.

### NEW ENGINES

CHRISTMAS IS normally the time when you'd expect quite a few new engines to emerge as the Software people look for good ways to extract some money from us.

However this year it looks to be a bit quieter than usual. Here's the ones I know about:

**CHIRON** I've mentioned above. It is a UCI engine and you can pay for it and download it at...

▪ [www.chironchess.com](http://www.chironchess.com)

## BILL REID'S "TIME FOR ADJUDICATION" TOUGH POSITIONS FOR COMPUTERS... AND SOMETIMES US!

Dear Eric

Many thanks for your excellent presentation of my SS156 contribution. I'm sending on for SS157 that I hope will make its way to your pages. But finally the time has come for me to retire! If ideas crop up I may send them to you, but I have to give up being a regular SelSearch writer.

With best wishes for more great issues.

*Eric: Of course that was disappointing, to say the least, for me - and I know for many of my readers.*

*Bill's contributions over the years have been nothing less than excellent, bending our minds and showing beyond argument that even our top PC engines on the fastest of hardware aren't always everything they are cracked up to be!*

*Very many thanks Bill for all of your efforts, I seriously hope that 'ideas will continue to crop up' !*

Here was Bill's **Time for Adjudication** for our last issue.

**Bill:** It looks as though using that word 'adjudication' is getting a bit tricky. Those old team captains and chess masters didn't just have to be able to find the best move in an unfinished game, they had to say whether it led to a loss, draw or win. Now we have programs like Houdini and Critter which can find the move that wins, but need to play a few more moves before they show the win as definite. So, *'Now To Find The Best Move!'* begins to look like a better title.

Well, how did they do on that position I showed in *Selective Search 156* ?

Black to Move

If we just do number counting we will decide that 1...Bxf4 is the way to go. Queen versus Rook must be a win. But this is one of those positions where humans would not do that because the tactical advantage is ruled out by statics.

After 1...Bxf4 2.Rd8 the Black queen is permanently trapped and the game is drawn.

Our human player would of course go 1...Qb8 and, with queen and bishop free to roam the board, those White rooks are not going to be able to save the game.

But can the modern programs calculate so deeply that, even without the ability to handle statics, they can see that 1...Bxf4 is not the way to go.

*I got an interesting contribution from Peter Grayson:*

*I had a look at the Bill Reid position SS156 over a pot of tea after I returned from work yesterday and agree with the comment that it was fairly easy to visualise the queen being trapped when White's rook got to d8 and then c8. Being on a White square the Black bishop cannot force the rook away and Black's king cannot approach because of the c6 pawn protecting d7.*

*From the human perspective there are only two moves to check but I did not expect any engine to get this because of the weight of the material gain of the rook after Bxf4. Then unless an engine has specific knowledge to identify the trapped queen scenario it would have to look ahead 100 ply to see the*

50 move rule and even then some engines may rely on the GUI. And so it was that none of the engines I used were able to find it, with the evaluation after Bxf4 ranging from -5.3 from Zappa Mexico II to -8.9 from Stockfish 2.1.1. I do not have all the latest commercial engines so I probably don't have the engine that you found discarded Bxf4.

As far as this being the way forward for humans against computer engines I suspect these positions arise few and far between. I think the divergence between man and machine has already occurred, similar to man racing a car. For some time cars have outpaced man but it does not stop men racing each other in a car. Similarly man versus machine chess will likely only have one outcome but man + machine versus man + machine chess balances it out.

*Eric:* Of course I had told you that I found an engine that did not play 1...Bxf4. Like Peter I had anticipated it would be difficult for them to get past those big material evaluations, so I left them on for longer than usual and Junior 12.5 changed to 1...Qb8 after 24 minutes!

*Bill:* However, as I said in SS156, producing positions like that 'does get a bit repetitious'. What we need is some research that can show HOW humans can use ideas like 'statics' and 'talking with the pieces' to engineer wins against the programs (and if that COULD be done, it would raise some interesting complications for Elo ratings!). Not something that I'm able to tackle.

Looking back at old copies of *SelSearch* I see that, in the October issue in 2002, I said 'I'm getting old and these new programs are too good for me'. But somehow I kept going. And then in SS121 (2005-6) my contribution was headed 'Is it Time to Retire?'. And again I came back with more challenges for the engines. This, however, does look like the time to take a back seat and just enjoy what Eric's other contributors come up with.

But let's just see how the programs have improved?! All but one failed completely on this position that I showed in SS127.

White to move

It's one of those that the team captains had to decide on when time was called - otherwise one of them would have to fork out five shillings plus postage to get a local master to make the judgement - and nowadays the postage would cost more than the five shillings! THEY had no problem agreeing that it had to be a draw. It does look as though Qxh8 wins, and that's what all the programs except Deep Fritz 10 went for in the report Eric did in SS128. But in fact Qxh8 loses! Surely our latest programs won't make such a mistake?

Finally my very best thanks and good wishes to Eric for the fine editorial work he does on *SelSearch*. I don't think any other editor would have kept me going for so long!

*Eric:* I had a look to see what engines we tested for SS128.

- **Shredder10:** 1.Qxh8? c5 2.Kf2. +1.66
- **Rybka2.1:** 1.Qxh8? c5 2.Kf2. +1.30
- **Rybka2.2n:** 1.Qxh8? c5 2.Kf2. +1.46
- **Hiarcs11:** 1.Qxh8? c5 2.Kf2. +1.69
- **Junior10.1:** 1.Qxh8? c5 2.Kf2. +2.46
- **LoopMP12.32:** 1.Qxh8? c5 2.Kf2. +1.88
- **Fritz9:** 1.Qxh8? c5 2.Kf2. +1.98

*There's a tricky reply to 2.Kf2 which Black must find to win!*

- **Fritz10:** 1.c5!? Bg7 2.Qxe3. 1.33

*We concluded at the time that 1.c5 would draw but not win (at least it won't lose!). And we also believed the immediate 1.Qxe3 would draw. Perhaps readers would like to check these out with our hopefully much improved engines on even faster hardware.*

## THE 23RD. GEBRUIKERS TOURNAMENT

BY ROB VAN SON AND ERIC HALLSWORTH

Already we have reached the 23rd edition of the **Gebruikers tournament**! This time there were nine computer chess enthusiasts who came away to **Leiden** with ten chess computers. Fortunately, the interest in user Tournament is fairly constant and the atmosphere does not change!

We opted for a five round tournament with one hour maximum playing time, but with a new idea using 15 secs per move as the computer setting and, to save using clocks, we stopped the game at the hour. There was provision for arbitration by Ries van Leeuwen if a game was still undecided, but in practice no arbitration was required, all games played to the end and were already completed after 50 minutes.

For the 23rd. Gebruikers we were only allowed to play with computers with an Elo below 2100 according to the **Wiki list**.

The participants were:

**Hein Veldhuis** with the Saitek Renaissance Brute Force, the Frans Morsch program that played solid chess with good

handling of material in its time. Look at the parties!

**Hans van Mierlo** had come with the Novag Emerald Classic and the Fidelity Mach III in its lovely wood Avant Garde board. The Emerald plays enterprising chess and the Mach III is very solid.

**Peter Schimmelpennink** played on the Mephisto Milano. This computer, programmed by Ed Schroder, plays quite changeably, sometimes surprises, sometimes quietly.

**Rob van Son** brought his Sphinx Galaxy 4.2, a version where some earlier bugs have been removed, so now it is a sound program of French Morsch.

**Theo Heukels** had his Mephisto Master again, a program of French Morsch which is on a fast processor and strong. Unfortunately Theo started with an incorrect setting, allowing two games to be virtually given away.

**Ruud Martin** came with the emulated Mephisto MM V in his Revelation board and running at 18MHz. Unfortunately this has not been a great success. Many games saw material and chances given away in the endgame.

**Luuk Hofman's** old Mephisto Rebell.5.0 by Ed Schroder played.

**Henk Weersel** came with a by Dave Kittinger, the Novag Obsidian.

The day again passed too quickly. But everyone likes it so well and, once again, there were several nice games and the usual surprises.

So on with the games with Eric's analysis. There were 2 good games in the very first round:

### Sphinx Galaxy CXG - Mephisto Milano

Round 1. A29: English Openings, Four Knight's Variation

1.c4 e5 2.♘c3 ♘f6 3.g3 d5 4.cxd5 ♘xd5  
5.♙g2 ♘b6 6.♘f3 ♘c6 7.d3 ♙e7 8.♙d2 ♙e6  
9.0-0 0-0 10.♖c1 f5 11.♚c2 *I expect our dedicated friends were out of the Books by now, but for the record 11.♙e3 is usually played here, then 11...♖h8 12.♚d2 is probably best 11...♚d7 12.♘g5 ♘d4 13.♚d1*

13...c5?! *Very bold, better seems to be [13...♙xg5 14.♙xg5 f4= 14.♘xe6 ♘xe6 15.♖e1 ♘d4 16.f4 I think 16.a4! threatening a5 would have maintained a definite advantage for White 16...exf4 17.♙xf4 g5 18.♙e5 ♚e6 19.♙c7! ♖ac8 20.♙xb6 ♚xb6 21.♘d5! ♚d6 22.e3 ♘e6 23.♚a4 a6 24.♚b3 ♙d8*

Peter above with the Milano, and Rob below with his Galaxy

*The Sphinx has a good position here. Though Black has more space the Galaxy's pawn structure is better and the ♘ is strong*

on its d5 outpost 25.♖xb7? The pawn is heavily poisoned! 25.♜f1! b5 26.♜c2 threatening to double rooks on the f-file would give the Milano plenty to think about 25...♜b8! The queen has nowhere to run to 26.♖a7 If 26.♜f6+ ♔xf6 and the queen escapes with 27.♖d5 ♜bd8 28.♖b3 but at the cost of the knight, and now 28...♜fe8 leaves Black well on its way to the win 26...♜f7 27.♖xf7+ 27.♜c7 wouldn't have worked: 27...♔xc7 followed by ♔a5 still wins the queen for rook exchange, and now with the knight off the board as well 27...♜xf7 28.♜f1 ♜xb2 29.♜xf5+ ♔e8 30.a4 ♜d2 31.♔e4 ♜a2 32.♜c3 ♜b2 33.♔d5 ♜c7 34.♜e4 ♖h6 35.♔f7+ ♔d7 36.♜xc5+? 36.♜f2 was more stubborn, but 36...♔e7+ 36...♔e7 37.h4 gxh4 38.♜cf1 ♖xe3+ 39.♔h1 hxg3 This is mate in 6: 40.♜e5+ ♖xe5 41.♜e4 g2+ 42.♔g1 gxf1 ♖+ 43.♔xf1 ♖f4+ 44.♜f2 ♖xf2# 0-1

### Saitek Centurion - Novag Obsidian

Round 1. C42: Petroff Defence

1.e4 e5 2.♜c3 ♜f6 3.♔c4 ♜c6 4.d3 ♔b4 5.♜f3 d6 6.0-0 ♔xc3 7.bxc3 0-0 8.♔g5 This isn't a particularly well known line and Black's next is pretty rare, you usually see 8...h6 or ♔e6. But the Obsidian was out of its Book by now of course. Mainline theory plays ♜a5 at move 4! 8...♜a5 9.♔d5 h6 10.♔h4 c6 11.♔b3 ♜xb3 12.axb3 ♜e8 13.c4 ♔g4 14.c3 ♜e6 15.♜e1 ♖e7 16.♖e2 ♖c7 17.♜a2 ♖d8 18.♜a1 ♔xf3 19.♖xf3 ♖b6 20.b4 ♜d7 21.♔g3 ♜f8 22.♖e2

The play has been of high quality and hard to fault in any way so far. Now however the Obsidian misses the fact that it's a-pawn is in danger! 22...♜g6?! 22...a6= 23.♖e3!

♖xe3 To avoid the exchange would mean 23...c5 24.♜a5 a6 25.bxc5 dxc5 26.♜xc5 leaving White a pawn ahead 24.fxe3 a6 25.b5! cxb5 If 25...c5 26.bxa6±. And not 25...axb5?? which loses a rook of course 26.cxb5 ♜c8 27.bxa6 bxa6 28.c4 ♜b8 29.♜xa6 ♜b2 30.♜6a2 ♜b3 31.♜a3 ♜b2 32.h3 ♜e8 33.♜1a2

33...♜eb8?! White's persistence pays off as Black decides to exchange a pair of rooks. 33...♜b1+ 34.♔h2 ♜f8± was probably better 34.♜xb2 ♜xb2 35.♜a6 ♜b1+ 36.♔f2 ♜b2+?! The first check was okay, but this just encourages the Centurion to improve its king's position 37.♔f3 ♜f8 38.♜xd6

38...♔e7 38...h5 was a better idea, to try and slow down the White king's advance 39.♖xg6?! A surprising way to aim for the finish... I'd have played 39.c5! But the Centurion's choice makes for a nice visual as the pawns charge forward! 39...fxg6 40.♙xe5 ♜d2? 40...♜c2 was the best defence, slowing the pawns down 41.d4! ♙f7 42.c5 ♜c2 43.♙d6 g5 44.d5 There doesn't seem to be anything Black can do, the Centurion is pushing the winning pawns exactly as it should! 44...h5 45.c6 g4+ 46.hxg4 hxg4+ 47.♙g3 ♙f6 48.c7 ♜c4 49.e5+ ♙f5 50.e6 ♙f6 51.e4!

A nice picture for Centurion fans! 51...g5 52.♙e5+ ♔e7 53.♙xg4 ♜c2 54.g3 The Centurion may not have known that this is m/9, but it's +9.99 eval certainly showed the game was definitely over 1-0

#### Results 1st round:

Centurion - Obsidian 1-0

Master - Brute Force 0-1

MM V - 5.0 Rebell ½-½

Mach III - Emerald ½-½

Galaxy - Milan 0-1

Here's a good game from round 2 as the Milano notches up its second win.

### Mephisto Milano - Saitek Centurion

A39: Symmetrical English

1.c4 c5 2.♘c3 ♘c6 3.♘f3 ♘f6 4.g3 g6 5.♙g2 ♙g7 6.0-0 0-0 7.d4 cxd4 8.♘xd4 ♘xd4 9.♙xd4 d6 10.♙d3 All mainline stuff, but now 10...♙f5 and a6 are usual and, if Black were to move the queen, 10...♙a5 10...♙b6 11.♙e3 ♙d7 12.♙xb6 axb6 13.♙xb7 ♙a7 14.♙g2 ♜c8 15.♙e3

15...♜xc4 15...♘g4 looks better, then if 16.♙xb6 ♜a6 and the bishop has no safe retreat square, so probably 17.c5 dxc5 18.♜ad1 ♜xb6 19.♜xd7 ♜xb2 temporarily equalising material, though White will win the e7 pawn soon and retain some advantage 16.♙xb6 ♜a6 17.♙e3 ♜b4 18.b3 ♙c6? Black shouldn't be exchanging bishops, more important is finding a way to challenge the connected passed pawns. They've a long way to go from a2 and b3, but 'connected passed' should always cause alarm bells! 19.♙xc6 ♜xc6 20.♜ac1!

20...♜b7? If the Centurion had put the rook on b8... 20...♜b8, then after 21.♘d5 ♜xc1 22.♘xf6+ ♙xf6 23.♜xc1 ♙b2, and things are not quite so bad 21.♘d5! ♜xc1 And now instead of ♘d5 as in the line just given... 22.♜xc1! h5 23.♜c8+ ♙h7 24.♜c7! ♜xc7 Moving the rook to b5 or b8 would just bring 25.♘xe7 and White is 2 pawns up, the delightful connected passed ones on the a and b files! 25.♘xc7 ♘e4 26.a4! Here they go 26...♘c3 27.♙f1 ♘d1 28.♙b6 ♘c3 29.a5 Black played 29...♘xe2 and resigned 1-0

Results 2nd round:

Milano - Centurion 1-0  
 Brute Force 1-0 Mach III 1-0  
 Emerald - MMV 1-0  
 Rebell - Galaxy ½-½  
 Obsidian - Master 1-0

Results 3rd round:

Brute Force - Milano 1-0  
 Obsidian - Emerald 0-1  
 Centurion - Rebell 1-0  
 Galaxy 5.0 - MS V ½-½  
 Mach III - Master 0-1

4th round results:

Emerald - Brute Force 0-1  
 Galaxy - Centurion ½-½  
 Master - Milan 1-0  
 Rebell 5.0 - Obsidian 1-0  
 MMV - Mach III 1-0

The SCORES at this point were:

| Pos | Computer                | Score/4 |

| 1   | BRUTE FORCE             | 4       |
|     |                         | 3½      |
|     |                         | 3       |
| 2=  | EMERALD CLASSIC PLUS    | 2½      |
|     | CENTURION               |         |
|     | MILANO                  |         |
| 4=  | MASTER                  | 2       |
|     | REBELL 5.0              |         |
|     | MM5                     |         |
| 8=  | SPHINX GALAXY           | 1½      |
|     | OBSIDIAN                | 1       |
| 10  | ELITE MACH3 AVANT GARDE | ½       |
|     |                         | 0       |

Well, we see that the Brute Force computer can't be caught, but Rob's e-mail sending the games and photos said: *"The game between the **Milano** (Peter) and Ruud's **MM5** in the last round was very exciting, especially as they were both on 2 points and in with a chance of a prize!"*

*I took some photos during that game and, as you can see next page, there were many spectators watching."*

So then, one more game to finish off with!

Top: Hein with his Renaissance Brute Force  
 Centre: Hans with his 2 entries, the Elite Mach3  
 Avant Garde and the Emerald Classic Plus  
 Bottom: Ries, Arbiter and here with his Centurion

# Meph Milano - Revelation MMV

D36: Queens Gambit Declined

1.d4 d5 2.c4 e6 3.♘c3 ♘f6 4.♙g5 ♙e7  
 5.cxd5 exd5 6.e3 c6 7.♙d3 ♘bd7 8.♚c2 0-0  
 9.♘f3 ♙e8 10.0-0 ♘f8 This is a popular  
 line, so I'd guess the computers might have  
 been in Book to here. Now 11.h3 is usual,  
 and the move played rare, so I think they are  
 now on their own 11.♙ab1 ♘g6 12.h3  
 12.b4! is good, and then 12...a6 has been  
 played by Ivanchuk amongst others  
 12...♘e4 13.♙xe7 ♙xe7 14.♘d2?! It was  
 actually better to return the ♙ for ♘  
 exchange with 14.♙xe4 dxe4 15.♘d2=. Now  
 Black gets the better position 14...♘xd2  
 15.♙xd2 ♙g5 15...♘h4! first, then ♙g5  
 would have been stronger 16.♙be1 ♙d7?!  
 It is surprising that the MMV didn't play  
 16...♙xh3 as the previous moves seemed to  
 have set that up! White has to play 17.f4  
 after which 17...♙g3! is strong 17.♙h1 ♙e7  
 18.f4 ♙f6 19.♙f2

19...♙ae8? Black had to stop White's next  
 with 19...♙f5 20.f5! ♘h8? An awful  
 square. Surely 20...♘f8 was better 21.e4!  
 ♙d6 22.e5 ♙h6 23.♙g3 ♙c8 24.♘a4 b6  
 25.f6 25.♙f4! threatening ♙g4 or ♙h4  
 would have given the MM5 serious  
 problems. The game now involves a lot of  
 shuffling about with little progress being  
 made for a while. Jump to the next diagram!  
 25...♙ce8 26.♘c3 g6 27.a3 a5 28.a4 ♙a8  
 29.♙f2 ♙e6 30.♙fe2 ♙ad8 31.b3 ♙a8 32.♙e3  
 ♙xe3 33.♙xe3 h5 34.♙3e2 ♙ec8 35.♘h2 h4  
 36.g3 hxg3+ 37.♘xg3 ♘h7 38.♙e3 c5  
 39.♙3e2 cxd4 40.♘b5 ♙d7 41.♘xd4 ♙c3  
 42.♙e3 ♙ac8 43.♙1e2 ♘h6 44.♙a6 ♙8c5  
 45.h4 ♙xe3+ 46.♙xe3 ♙c1 47.♙e2 ♙g1+  
 48.♘h2 ♙b1 49.♙f3

I must say that Ruud Martin with the Revelation MMV looks a lot more relaxed with the position than Peter Schiimmelpennink, especially in the photo below!

Black's next encourages the Milano king  
 towards a better, centralised square, and the  
 game comes to life again. Better was 49...g5  
 49...♙b2+?! 50.♘g3 ♙d2 51.e6! fxe6  
 52.♘xe6 d4 53.♙e4 ♙xe6 54.♙xe6 ♙d3  
 55.♙xb6 g5 56.f7+ Or 56.♘g4! 56...♘g7  
 57.f8♙+ ♘xf8 58.hxg5 ♘g7 59.♙b7+ ♘f8

60.♔g4 ♖c3 61.♖b5 d3

It's looking interesting. White is a pawn up but what can the d3-pawn do to change everything!? 62.♖xa5 ♖xb3 62...♔g6 63.♖a6 ♔e5+ 64.♔f4 ♔xf3 65.♔xf3 ♖xb3 was the promising alternative, but if 66.♔e3 d2+ 67.♔xd2 ♖g3 the tablebases say it is now actually mate in 34 (for White). But our dedicated friends wouldn't know that and in practice who can say what would happen?! 63.♖a8+ ♔g7 64.♖g8+ ♔xg8 65.♔d5+ ♔g7 66.♔xb3 d2

This is good fun! 67.♔f4! ♔f7 68.♔c2 68.a5! ♔d6 69.a6 ♔c8 70.♔c2 ♔f8 71.g6 also wins 68...♔d6 69.♔e3 ♔f7 70.g6 d1♚

71.♔xd1 ♔xg6 White has to win now, but let's watch the finish. With best play it's m/21 72.♔d4 ♔d6 73.♔c5 ♔b7+ 74.♔c6 ♔a5+ 75.♔b5 ♔b7 76.♔c2+ ♔f6 77.♔d3 ♔e5 78.♔b6 ♔d6 79.a5 ♔d4 80.♔f1 ♔e5 81.a6 ♔d5 82.♔c7 ♔e8+ 83.♔b7 ♔d6+ 84.♔b8 ♔c4 85.♔xc4+ ♔xc4 86.♔c7 It's now m/11, so White has missed some best moves. But obviously Black knows it's game over and resigned before Ries had the chance to come over and adjudicate the game! It certainly wouldn't have posed him the same problems as some of Bill Reid's 'Time for Adjudication' positions! 1-0

#### Results 5th round:

Centurion - Brute Force 1-0  
Rebell 5.0 - Emerald 0-1  
Milano - MM V 1-0  
Master - Galaxy 1-0  
Mach III - Obsidian ½-½

The Cups were given out at the end as always, **Hein** was 1st., **Ries** 2nd on tie-break., and **Hans** came 3rd. but wasn't at the Award Ceremony, so Ries took his cup! I'm sure he will send it to him!!

## TWO GREAT IDEAS for CHRISTMAS PRESENTS!

**BOBBY FISCHER AGAINST THE WORLD (DVD) - A FILM BY LIZ GARBUS. RUNNING TIME: 94 MINS**

RRP £12.99 - London Chess Centre PRICE £11.99

The hardest match he played was the one in his mind

***Bobby Fischer Against the World*** traces the life of the Grand Master from child prodigy to Cold War hero to controversial recluse. Cutting interviews with Bobby and the people who knew him, with footage and news reports, Bobby Fisher Against the World is a mesmerising portrait of the rise and bizarre fall of one of the great American icons.

In 1958, 14-year old Robert James Bobby Fischer stunned the chess world by becoming the youngest Grand Master in history, launching a career that would make him a legend. Raised by his mother in Brooklyn he taught himself to play chess at the age of six and started beating seasoned adult chess players when he was just eight. Throughout the sixties, as his star rose, Bobby would appear regularly on TV and when touring the world he was resoundingly beating all-comers. His career highlight came in 1972 when he played the Russian Grand Master and reigning champion Boris Spassky - a series that was perhaps as equally tied in with the Cold War as it was with chess. After an astonishing start to the match in which Fischer blundered in game 1 and defaulted game 2 by simply not turning up, his amazing fightback and eventually comfortable victory made Bobby the most famous person on the planet. Then his already erratic behaviour began spiralling out of control, turning this genius into an unrecognisable recluse and pariah.

**GARRY KASPAROV ON GARRY KASPAROV PART 1: 1973-1985. HARDCOVER, 520 PAGES**

RRP £30.00 - London Chess Centre PRICE £25

***Garry Kasparov on Garry Kasparov, part 1*** is the first book in a major new three-volume series. This series will be unique by the fact that it will record the greatest chess battles played by the greatest chess player of all-time. The series in itself is a continuation of Kasparov's mammoth history of chess, comprising *My Great Predecessors* and *Modern Chess*. Kasparov's historical volumes have received great critical and public acclaim for their rigorous analysis and comprehensive detail regarding the developments in chess that occurred both

on and off the board.. This new volume and series continues in this vein with Kasparov scrutinising his most fascinating encounters from the period 1973-1985 whilst also charting his development away from the board.

This period opens with the emergence of a major new chess star from Baku and ends with Kasparov's first clash with reigning world champion Anatoly Karpov – a mammoth encounter that stretched out over six months. It had been known in Russia for some time that Kasparov had an extraordinary talent, but the first time that this talent was unleashed on the western world was in 1979. The Russian Chess Federation had received an invitation for a player to participate in a tournament at Banja Luka and, under the impression that this was a Junior event, sent along the fifteen year old Kasparov (as yet without even an international rating!). Far from being a Junior tournament, Banja Luka was actually a major International event featuring numerous world class Grandmasters. Undeterred Kasparov stormed to first place, scoring 11½/15 and finishing two points clear of the field. Over the next decade this "broad daylight" between Kasparov and the rest of the field was to become a familiar sight in the world's leading tournaments

**About the Author:** Garry Kasparov is generally regarded as the greatest chess player ever. He was the thirteenth World Champion, holding the title between 1985 and 2000. His tournament record is second to none, featuring numerous wins in the world's major events, often by substantial margins. As well as his outstanding successes, Kasparov has constantly promoted the game; he has done more than anyone to popularise chess in modern times.

Other titles in the Kasparov series are:

- **My Great Predecessors.** [1] Steinitz to Alekhine £25, [2] Euwe to Tal £25, [3] Petrosian + Spassky £25, [4] Fischer £25, [5] Korchnoi + Karpov £30
- **Kasparov on Modern Chess.** [1] Revolution in the 70's £30, [2] Kasparov v Karpov 1975-1985 £30, [3] Kasparov v Karpov 1986-1987 £30, [4] Kasparov v Karpov 1988-2009 £30

Both the BOOK and/or the DVD can be purchased from **THE LONDON CHESS CENTRE**, tel. 020 7288 1305. Web: [www.chess.co.uk](http://www.chess.co.uk). This is NOT an advert, it's my own 'nice present' RECOMMENDATIONS, but please do mention *Selective Search* if you place an order.

P.S. If you go to their website you can download a pdf file extract from Kasparov's new book!

some danger: 20.♖d1 ♕c8 21.♘d5!±  
20.♘d5+ ♔d6?!

If 20...♕xd5 21.♕xd5 Black could play 21...c6 22.bxc6 ♘xc6 23.♖xc4 ♖hc8. White's rooks look better but its advantage is minimal

21.♖d1!

Obvious but still worth a !

21...♕xd5 22.♖xd5+ ♔e7 23.♖ad1 axb5  
24.♖d7+ ♔e6 25.♖xg7 ♘c6 26.♕d5+ ♔d6  
27.♕xc4+

White equalises material

27...♔c5 28.♕e2 ♖a2 29.♖xc7 ♖xb2

Rybka has 2 passed pawns – but they're both on the b-file!

30.♕f3 ♔b6 31.♖f7 ♖h6 32.♔g2 b4  
33.♖dd7 ♘a5 34.♖d6+ ♘c6 35.e4

35...b3?

35...♔c5 was correct, and if 36.♖d5+ ♔b6 it is not easy for Black to find a win. Perhaps risk the advancing b4-pawn and grab the one on b7 with 37.♖dd7 h4 38.♖xb7+ ♔a5±  
36.e5! ♖a2

I think 36...♖c2 gave Black the best chance of saving this game, then probably 37.e6 ♖h8 38.♖d3 all as in the game, but this is better for Black than it is with the rook on a2

37.e6 ♖h8

37...b2?! doesn't work: 38.♕xc6 bxc6 39.♖d8. Now Black can delay the e7 threat with 39...b1♗, but not for long: 40.♖b8+ ♔c5 41.♖xb1 ♖e2 42.e7 f5 43.♖d1  
38.♖d3 ♖a3 39.♕d5 ♘a5 40.♕xb3 ♖e8

Not 40...♖xb3? 41.e7! ♖xd3 42.♖f8 1-0  
41.♖d6+ ♔c5 42.♖d5+ ♔b6 43.♕d1 ♖xe6  
44.♖xh5 ♘c6 45.♖hh7 ♔c5 46.♖xb7 ♖e1  
47.♕b3

47...♘d4

47...f5 was the best chance, and after 48.♖h6 ♖b1 needs some thinking about, though 49.♖c7 ♖bxb3 50.♖hxc6+ ♔d5 51.♖f6 looks to settle it

48.♖hc7+ ♘c6 49.♕c4

A nice little idea

49...♖a5 50.♖c8 ♖d1 51.♖bc7 ♔xc4  
52.♖xc6+ ♔d5 53.♖xf6 ♔e5 54.♖h6 ♖aa1  
55.f4+ ♔e4 56.♖e8+ ♔d4 57.♖d6+ ♔c5  
58.♖xd1 ♖xd1

The game could be stopped here, White has the win for certain 59.♖c8+ ♔b6 60.g4 ♖d2+ 61.♔g3 ♖d3+ 62.♔h4 ♖d5 63.f5 1-0. So Hiarcs regains it's 2 point lead, 3½-1½

## RES II-RYBKA 2.2N8 - REV-HIARCS 13.3

Game 6.A22: English Opening

1.c4 e5 2.♘c3 ♘f6 3.g3 ♕b4 4.♕g2 0-0 5.e4  
d6 6.♘ge2 ♕c5

Surprisingly this isn't in my Powerbooks though it and White's response were played in Dvoretzky-Reshevsky in 1978 as well as in a couple of other lesser games. It also puts Rybka out of book and the Rybka move does the same to Hiarcs. Although Rybka considers Hiarcs to have a slight advantage, Hiarcs rates itself +64 which seems to me to be a bit on the high side

7.0-0 ♕e6N

This is new, 7...♘c6 is the only database move I could find

8.d3 a5 9.♘a4 ♘c6

Knowing that Mark Uniacke slightly favours bishops over knight in the Hiarcs engines I was surprised the engine didn't prefer 9...♕a7 here to avoid the exchange. Then if 10.♘ac3 ♖e8, but I guess Hiarcs must have seen something along the line it

didn't like

10.♖xc5 dxc5 11.♙e3 ♖d6 12.♖c3 ♘g4  
13.♘d5

White could have retained the slight advantage of the two bishops by playing 13.♙c1, but was obviously attracted by the knight outpost

13...♘xe3 14.fxe3 f6 15.♖b3 b6 16.♖a4  
♘a7

17.♙f3?

Missing a tactic based on the undefended d3-pawn, which is why 17.♖ad1 was necessary. E.g. 17.♖ad1 and after 17...c6 18.♖c3 ♖c7 19.♖c2 when Black's advantage is minimal at best

17...c6 18.♖xb6

White can't play 18.♖c3? because of 18...♖xd3 19.♖fe1 ♖xc4+

18...♖ab8 19.♖xa5

White is 2 pawns up, but the ♖ cannot be saved

19...♖c7 20.b4 ♖xb6 21.♖xb6 ♖xb6  
22.bxc5 ♖a6 23.a4 ♖a5 24.♖fb1

Black still has a knight for 3 pawns, but already one feels that the Rybka pawns could be suspect in due course

24...♖d8

24...♖xc5? would be a mistake as Rybka could then have levelled the game with

One of Ruud Martin's RESURRECTION boards

25.a5! f5 26.♖b7 ♖f7 27.a6∞

25.♙e2 ♖c8! 26.♖b8! ♖f7

Again not 26...♖xc5? because of 27.a5! ♖f8. I didn't find it so easy to see why this is an only move, but my laptop showed me that if, say 28.a6 ♖a7!

Let's not play the necessary ♖f8. So after 27.a5! let's try 27...h6? 28.a6! But now 28...♖f8 is too late: 29.a7 ♖xa7 (forced) 30.♖xf8+ ♖xf8 31.♖xa7. Here White's extra pawn and rook on the 7th will win quite easily) 29.♖b7+—

27.h4 ♖g8 28.g4 ♖f7 29.♖b7+ ♙d7

30.♖b8

30.d4!? might have been worth a try. If 30...exd4 31.exd4 White's pawns are beginning to threaten and could even be worth more than the knight!

30...♖e8 31.♖f2 ♖e7!

Readers will note that I have stopped commenting that ♖xc5 is ? The reason is the same: with a5 White would get a good advantage every time

32.♖xd8+ ♖xd8 33.d4 ♖g6

The clever transfer of the knight to the kingside has put Black on top

**34.g5**

34.h5?! turns out well for Black after  
34...♖f8 35.d5 h6 36.♙d1 ♙c8 37.♗f3 ♘d7  
38.♗e2 ♘xc5-+

**34...fxg5 35.hxg5 ♘f8**

**36.d5**

Not the tempting 36.dxc5? as 36...♗e6 and the doubled c-file pawns and tripled (!) e-file pawns leave White stymied (stuck). E.g. 37.♙g4 ♘xc5 38.♗f3 ♙xg4+ 39.♗xg4 ♙xa4 and White is the equivalent of a pawn down and still has those weak tripled pawns, so Black must win

**36...♙c8 37.♗g2 ♙xc5 38.♙f1?!**

You will probably not be surprised to know that my suggestion of 38.a5! was best here. Though it is no longer winning for White, it would just keep the Rybka engine in the game with drawing chances after 38...♙a6 39.♗g3 ♗e7 40.♙g4 cxd5 41.exd5, leaving White the equivalent of a pawn down but the pawn weaknesses partially sorted. But I do like the look of 41...e4! and after leaving PC engines on for a while this does appear to be strong for Black

**38...♗e7 39.♙b1 ♙a6 40.♗f2**

Now Black should play 40...♘d7 intending 41...♗d6 and the pawn on c4 will fall soon, but instead Hiarc's partially gives Rybka a chance to get back into the game

**40...♗d8? 41.♙f1?!**

41.♗g3! g6 42.♙b8+ ♙c8 43.a5 ♙xa5 44.♙g4 ♘d7 45.♙xc8+ ♗xc8 46.dxc6 ♗d8 (the ♗ is pinned) 47.cxd7 with a fighting chance of a draw with careful play!

**41...♙a5 42.♙a1 ♘d7 43.♗g3 ♗e7 44.♗f3 ♙c8 45.♗g3 c5 46.♙d3 ♙a6 47.♗f3 ♗f7 48.♗g3**

At the moment it seems that Hiarc's is struggling to find a way to win this, but now it comes up with a breakthrough move  
**48...♘d7! 49.♙e2 ♘b6 50.♙f1+ ♗e8 51.♙b1 ♘xc4 52.♙b8+ ♗e7 53.♙g8 g6**

53...♗f7 was better, and after 54.♙a8 ♙b7! 55.♙d8 ♗e7-+  
**54.♙g7+**

**54...♗d8?**

Hiarc's has misplaced its king on the back rank more than once, and this allowed White another decent chance to save the game.

Instead 54...♗f8 55.♙xh7 ♘d6 56.♙a7 (if 56.♙f3 ♘f7!-+; or 56.♙xa6 ♘xe4+ 57.♗h4 ♙xa6-+) 56...c4!-+

**55.♙a7?**

Rybka misses its last chance. Correct was 55.♙g4! ♘xe3 56.♙e6 and the d-pawn has become much more dangerous, plus there are also chances of a perpetual check

**55...♙c8!**

The only move to keep a win in sight  
**56.♙xh7 ♘d6 57.♙b8+ ♗c7 58.♙h7+ ♗b8 59.♙b5**

If 59.♗f3 ♙xa4-+  
**59...♘xe4+ 60.♗g2 ♙f5 61.♙e7 ♘d6! 62.♙c6 c4!**

Hiarcs should win from here, the running c-pawn is very strong

63.♔f1 c3 64.♔e2 ♖a7 65.♖xa7

If 65.♖xe5 c2 66.♔d2 ♘c4+ 67.♔c1 ♘xe5 is m/9

65...♔xa7 66.♔d1 ♔b6 67.♙a8

67.♙b5? is no better: 67...♘xb5 68.axb5 ♔xb5 and all White can do is delay the end by pushing the d-pawn. But after the Black ♔ captures it then it comes down the board to win the game

67...♙b1 68.♔c1 c2 69.♙c6 ♘e4 70.♙b5 ♘c3 71.♙c4 ♔c5 72.♙b3 ♘e2+

Steve says that Hiarcs had announced mate in 10 at move 70 and after 73.♔d2 c1♙+ 74.♔xe2 would have various ways to finish the game. One is 74...♙b2+ 75.♔f1 ♙xb3 76.♔f2 ♙e4 77.♔e1 ♙b2 78.a5 ♙d3 79.♔d1 ♙c2+ 80.♔e1 ♙e2# 0-1

### REV-HIARCS 13.3 - RES II-RYBKA 2.2N8

Game 7. D48: Semi-Slav, Meran System

1.♘f3 ♘f6 2.c4 e6 3.d4 d5 4.♘c3 c6 5.e3 ♘bd7 6.♙d3 dxc4 7.♙xc4 b5 8.♙d3 ♙b7 9.0-0 a6 10.e4 c5 11.d5 ♙c7 12.dxe6 fxe6 13.♙c2 c4 14.♘d4

The Hiarcs book ends, it shows +26  
14...♘c5 15.e5

In this often played opening 15.♙e3 is more popular here, and e5 actually has a poor 20% record! But being rarer it puts Rybka, showing only +3, out of its book 15...♙xe5 16.♖e1 ♙d6 17.♙f5 ♖d8 18.♘xe6 ♙xd1 19.♘xd1 ♘xe6 20.♙xe6

Once more the queens have gone early, and again Black is struggling to castle! But this game was actually still in theory, though now 20...♙e7 21.♙g5 was played in a game involving Szabo

20...♘e4N 21.♘c3 ♙b4 22.♙f4 ♖f8

It looked as if 22...♘xc3?! 23.bxc3 ♙xc3 would win a pawn, but 24.♙d5+ ♘d7 25.♙xb7 ♙xe1 26.♖xe1 ♖he8 27.♙e4 has won it back, though the material imbalance (B+B v R+P) makes it difficult to be certain that White has as big an advantage as the PC engines suggest. I certainly don't like the threat those 3 Black queenside pawns bring to the game!

23.♙e5 ♘xf2 24.♙xg7 ♘d3 25.♙xc4+ ♘xe1 26.♖xe1+ ♔d7 27.♙xf8 ♖xf8

The exchanges have left White a pawn up, but now it is Black that has the 2 bishops and a much more active king, so the position is 'uncertain'

28.♙d3 ♙c5+ 29.♔h1 ♙d4 30.♘e4 ♙d5 31.b3 ♔c6! 32.♙b1 ♙g7 33.♘g3 ♖f2 34.♘f5 ♔b6 35.♔g1

35.♘xg7 would have been okay, though we'd soon see it doesn't win a bishop after 35...♖xg2 36.♙e4 ♙xe4 37.♖xe4 ♖xg7 and material is equal and the game almost certainly drawn

35... $\text{R}xg2+$  36. $\text{K}f1$   $\text{K}c5$  37.a3  $\text{R}g5$  38.b4+  
 $\text{K}b6$  39.h4  $\text{R}g4$  40. $\text{N}xg7$   $\text{R}xg7$  41. $\text{R}e5$   $\text{R}f7+$   
 42. $\text{K}e1$   $\text{K}c4$  43. $\text{K}d2$   $\text{R}f6$  44. $\text{K}e3$   $\text{R}h6$   
 45. $\text{R}e4$   $\text{K}c6$  46. $\text{R}d4$   $\text{K}d5$  47. $\text{K}f5$   $\text{K}e6$  48. $\text{K}c2$   
 $\text{K}d5$  49.a4

49... $\text{R}e6+?$ !

This is a small mistake at least – maybe it's a big one?! It allows the White king to penetrate, so probably 49...  $\text{R}h5$  or  $\text{K}d6$  were better choices

50. $\text{K}f4$  h6 51. $\text{K}f5$

The Hiarcs engine shows a positive evaluation and is probing to increase its advantage, while the Rybka engine is passive, looking for a draw. This negative approach now allows White to increase its advantage

51... $\text{R}d6?$ !

51... $\text{R}e3$  was better, and after 52.axb5+ axb5 53. $\text{K}f6$   $\text{K}d6$  could hold

52.axb5+ axb5 53. $\text{K}d3$   $\text{K}e6+$  54. $\text{K}e5$   $\text{R}xd4$   
 55. $\text{K}xd4$

Although we now have a same coloured bishops ending, this could still be a draw of course. But there's no doubt White has an initiative with its much better king, so Black will always have to be careful

55... $\text{K}a2?$

It took me a long time to work out that this

was the losing move, but the failure of the Rybka king to take the opposition actually puts Black at a bigger disadvantage than you'd expect!

55... $\text{K}d6$  loses a pawn but 56. $\text{K}xb5$   $\text{K}d5$   
 57. $\text{K}c4$   $\text{K}c6$  might get the draw

56. $\text{K}e5!$   $\text{K}c4$  57. $\text{K}g6$   $\text{K}e2$  58. $\text{K}e8+$   $\text{K}c7$   
 59. $\text{K}d5$   $\text{K}b6$  60. $\text{K}d6$   $\text{K}b7$  61. $\text{K}e6$   $\text{K}c7$   
 62. $\text{K}e7$   $\text{K}f1$  63. $\text{K}h5$

63... $\text{K}g2?$ !

63... $\text{K}c6$  was better, then 64. $\text{K}e6$   $\text{K}c7$   
 65. $\text{K}f6$   $\text{K}d6$ . Now White would need to find  
 66. $\text{K}f3!$  which retains winning chances

64. $\text{K}f6!$   $\text{K}d6$  65. $\text{K}g6$   $\text{K}d5$  66. $\text{K}e2$

The only way to win... and it does!

66... $\text{K}d4$  67. $\text{K}xb5$   $\text{K}c3$  68. $\text{K}e2$

Again the only winning move – well played Hiarcs!

68... $\text{K}xb4$  69. $\text{K}xh6$

Now the White bishop must stop its Black equivalent from taking the pawn. If it does the game is drawn of course

69... $\text{K}c3$  70.h5  $\text{K}e4$  71. $\text{K}g5$   $\text{K}d4$  72.h6  $\text{K}h7$

Playing 72... $\text{K}e5$  would probably make it more difficult for White practically, as the bishop stops White from playing h7. But White can go 73. $\text{K}h5$  and if 73... $\text{K}d3$  74. $\text{K}g6$  of course

73. $\text{K}h5!$   $\text{K}c4$

74. $\text{K}g6$   $\text{K}g8$  75. $\text{K}f6$   $\text{K}b5$  76. $\text{K}g7$  is the winning route A very interesting game at times, and an ending that requires care and precision to win. 1-0. Of course Hiarcs has now won 3 games in a row, so leads by 5½–1½ and therefore will win the match. But you'd expect Rybka might make it a bit closer over the final games!?

# RES II-RYBKA 2.2N8 - REV-HIARCS 13.3

Game 8. D00: Unusual lines

1.♖c3 ♘f6 2.d4 d5 3.♘f3 c5 4.dxc5 ♘c6  
5.e3N

5.e4 d4 6.♘e2 is more usual, but the whole line is quite rare so it is not surprising that Rybka was already out of its book and manages to play a totally new move. And it looks okay to me!

5...e6 6.♙d3

Now Hiarc's is out of book. The evals have the game as almost equal

6...♙xc5 7.0-0

We've transposed into a line that was played in a club game on my database in 2005, and here Black continued 7...0-0 8.h3 (isn't 8.e4 better!?) a6. I also found 7...♙b4?! but 8.e4 is now good for White  
7...e5!? 8.e4 d4 9.♘a4?!

The placement of this knight (unprotected) will cause White a problem

9...♙e7 10.c3 ♙g4!

11.h3?!

I prefer 11.cxd4 ♘xd4 12.♙e2 ♙xf3 13.♙xf3 when Black is slightly better developed but the game is fairly even

11...♙xf3! 12.♙xf3 ♙a5!

Exposing the knight's problem which I referred to

13.♙c2 b5 14.♘c5 ♙xc5 15.b4 ♙b6

15...♘xb4 16.cxb4 ♙xb4 would have put Black 2 pawns up, but Rybka would get some counterplay with 17.♙g5. Black would stand better here, but with 15...♙b6 I think Hiarc's was typically trying to retain more initiative

16.bxc5 ♙xc5 17.♙d2 b4?!

Hiarc's gets away with this. 17...0-0 was correct, then perhaps 18.♙ac1 ♙d6

18.c4?!

18.♙g5! dxc3 (18...bxc3 19.♙xf6 gxf6 20.♙xf6=) 19.♙ad1 equalises

18...0-0 19.a3 a5!

19...♙xc4?! is not as good as White could play 20.♙fc1 and after 20...♙e6 21.axb4= 20.♙a4 ♙fc8 21.♙fc1 ♘e7 22.♙a2 ♘g6

23.g3 ♙cb8 24.h4 ♘f8

Hiarc's handling of the knights is entertaining and interesting. Steve says it reminded him of Petrosian! Now Rybka's a3 and c4 pawns are in trouble and White must decide which one to lose

25.♙ca1?!

If 25.♙c2 bxa3 26.♙xa3 ♙xc4. This is still not so good for White, but it might have been slightly better than the game line

25...♙xc4 26.♙c2 ♙a6 27.♙c5

Rybka has reacted aggressively to the loss of the second pawn, but...

27...♘e6! 28.♙xe5 d3! 29.axb4 axb4

30.♘g2 ♘d4 31.♙f4

31...♘e2

31...b3! also looks very strong!

32.♙f3 ♘c3 33.♙g5 ♘h8 34.♙xc3 bxc3

35.e5 ♘g8 36.♙xf7

White has equalised the material, but...

36...♙b7+! 37.♙xb7 ♙xb7

Black's connected passed pawns are immense

38.♖g4 ♜xa4 39.♖gxa4 c2 40.♖c4 ♜b1  
41.♖a8 d2! 42.♖cc8

Here and also during the next few moves Hiarc is threatened with mate in 1!

42...h6

The mate threat could also be met with 42...♖g1+ 43.♔xg1 c1♖+. In a moment Hiarc will sac' a rook while under a mate threat!

43.♖xg8+ ♔h7 44.h5 ♖g1+ 45.♔h2 ♜h1+  
46.♔xh1

[If 46.♔g2 ♜xh5 and White's mate threat ends as the Black ♔ now has an escape square on g6

46...d1♖+ 47.♔g2 ♖d5+

47...♖d5+ 48.♔h3 ♖xg8 49.♖a1 ♖e6+ etc.

0-1. Steve's favourite game from the mach. The watching gallery (consisting of Steve and his cat) showered the board with gold coins!

## REV-HIARCS 13.3 - RES II-RYBKA 2.2N8

Game 9. B23: An interesting way to get into a Closed Sicilian

1.♟c3 c5 2.e4 ♟c6 3.♙b5 ♟d4 4.♙c4 e6  
5.♟ge2 ♟f6

Hiarc is out of book early again – it's an interesting result of Steve forcing the computers to go with his choices of first move – they have often been 'thinking' early! In some ways this is a truer test of an engine's chess skill.

6.0-0 a6

In fact Rybka was still in its book and there are quite a few known moves for White here, with 7.a4 and 7.d3 at the top of the list. But Hiarc comes up with something totally

new which, if you check one or two PC engines, you'll find they rate quite highly! And of course Rybka also is now on its own, and showing –11

7.♙b3!?N ♖a5 8.d3 ♟xb3 9.cxb3 ♙e7  
10.d4 0-0 11.♖e1 ♖c7 12.♙f4 d6 13.dxc5  
♖xc5 14.♖d2 ♙d7 15.♖fd1 ♟g4 16.♟g3

The computers have reached a quite interesting position which gives equal chances 16...f6?!

Although Black's centre looks formidable after this, it does slightly weaken Rybka's king safety. So perhaps 16...♖ad8= 17.♖ac1 g5?!

A bit wild!? 17...♖a7 seems to be best, and if White plays 18.♖e2 ♟e5 19.♙e3 ♖b8 and now I like 20.f4!? ♟f7±

18.♟d5!

18...♖xf2+

Sadly for Black it's the only move 19.♖xf2 ♟xf2 20.♟xe7+

Not 20.♔xf2? immediately when Black would at least equalise with 20...exd5 21.♙e3 dxe4 22.♟xe4 ♖fc8 23.♟xd6 ♖xc1 24.♖xc1 ♙xd6 25.♖d1 ♙xh2 26.♖xd7 ♙e5 20...♔f7 21.♔xf2 gxf4 22.♟gf5 exf5 23.♟xf5 ♙xf5 24.exf5 ♖fc8 25.♖c3 ♔e7 26.♔f3

White's rooks are better, so Rybka sensibly exchanges a pair of them even though it does improve the Hiarc's pawns

**26...Rxc3+ 27.bxc3 Rxc8 28.Rd3 Rg8 29.Rd4 Qd7 30.Rxf4 Rxc8 31.Rc4!**

Hiarc's is a pawn up. To exchange rooks or not!? I believe Hiarc's knows the right answer, but does Rybka?

**31...Rxc4?**

If 31...Rxc4 32.Rxc4 d5 33.Rxc4 Qe7 34.Qe3 (aiming to win the d5 pawn if possible) 34...Qf7 35.Qd4 Qg7 36.Rh3 Rxd8, and Black is just about hanging on!

**32.bxc4 Qc6?!**

The wrong way, as Hiarc's shows immediately. 32...Qe7 would pose White more problems. But if it found 33.g4! Qd7 34.Qe4 Qe7 35.Qd5 then best is 35...h6 36.a4 Qd7 37.c5 dxc5 38.Qxc5 Qc7 39.a5 and White is still going to win

**33.Qg4 b5 34.cxb5+ axb5 35.a3 Qd5 36.Qh5! Qe5 37.g4 Qf4 38.h3 Qe4 39.Qh6 d5 40.Qg7**

Strange! Why not just 40.Qxh7 Qf4 41.Qg7 1-0

**40...Qd3 41.g5**

Not 41.Qxh7? which would actually give Black a bit of hope: 41...Qxc3 42.g5 d4 43.gxf6 d3 44.f7 d2 45.f8 Q d1 Q. However

46.Qg7+ Qb3 47.Qg3+ Qb2 48.f6 and White will get a second queen.

The end would be 41... fxc5 42.f6 Qxc3 43.f7 and queens next move to win easily.

**1-0.** If you're keeping count it is now  $7\frac{1}{2}$ - $1\frac{1}{2}$  for Hiarc's!

## RES II-RYBKA 2.2N8 - REV-HIARCS 13.3

Game 10. A26: English Opening vs Kings Indian defence

**1.Qf3 Qf6 2.c4 g6 3.g3 Qg7 4.Qg2 0-0 5.0-0 d6 6.Qc3 Qc6 7.Bb1 e5 8.d3 a5 9.a3 Qg4**

Now you usually get 10.h3 or 10.b4, though Nd5 and Bg5 have also been tried, but Rybka is out of its book and goes with... **10.Qe3N**

Hiarc's is now out of book as well, showing White +27, though Rybka is on only +6 **10...Qc8 11.Qb3 Qd7**

**12.Qxb5**

It is easy to see the b-pawn is poisoned: 12.Qxb7? Rfb8! but if 13.Qxe5 Black must play 13...Qxe5 (winning the queen immediately is careless 13...Rxb7 14.Qxd7! Qxd7 with only a small advantage). Now 14.Qxa8 Qxa8+ is pretty much forced and clearly good for Black

**12...Rfb8 13.Rfd1 a4 14.Qxa4?!**

It was better not to take the pawn, but instead play 14.Qg5! and if 14...Qf5 15.b4 axb3 16.Qxb3=. Now a tactical melee results in an unusual material imbalance

**14...Ra5! 15.Qxe5 Qe6 16.Qxc6 Rxb5**

What an interesting material difference! White will win a rook, so we're going to have R+N+P v Q. But White must NOT be tempted to win the b8-rook immediately and instead go after the b5-rook!

17. d4

If 17. dxb8? h5 18. dxc3 e8 19. bxb7 bxb8 and White has R+3P for the Q which is nothing like as good, in fact Black should certainly win from here

17... e8 18. dxb5 ex2 19. d2 g4 20. e1 d7 21. f3 e6 22. dxc3 d5 23. b3 e8

23... d4!? looks good: 24. dxd4 g4!

25. fxg4 exd4

24. eee2 c6 25. d4 d6 26. b4 d7 27. f2 a8

28. c5

The alternative was 28. cxd5 and now 28... exd5 29. dxd5 cxd5 30. dxc2 is the best continuation, leaving Black with a small advantage

28... e7! 29. a4 exd4 30. exd4 b6!

Good play by Hiarc

31. c2

Rybka can't take the pawn 31. cxb6? as 31... bxb4 attacks both the bishop and knight and White must lose one or the other

31... bxc5 32. bxc5 a5 33. b2 f8

33... cxc5 was also possible

34. f1 xc5 35. b6 c8?!

Here 35... xa4 was also possible, probably better in fact: 36. xa4 xa4 leaving White with R+B v Q+P. But I must confess I find it hard to assess best lines in material imbalance situations like this, most of us humans are not really used to them and I'm sure that the computers play them better, more objectively

36. eb2 d7 37. b7 d8 38. f2 f6 39. d4 xf3

40. b3?!

Probably moving the other rook (so b7b3) was better, Rybka needs to be defending here

40... f5 41. b2 f6 42. e1 g4 43. e2 f3 44. d2?

44. b1 was vital, then 44... h5 45. g2 though it's still looking difficult for Rybka. As it happens Hiarc misses the definitely winning reply!

44... f5?!

Not best, though Hiarc is still ahead. But 44... c5! 45. dxc5 d4 46. e4 d5 wins, 0-1

45. b4?

This mistake DOES get punished. 45. g2 was necessary, and after 45... d3 White could try 46. b4 though 46... c5 47. dxc5 d4 and only 48. f1 stands a chance as Black must find 48... e3. If Hiarc had found that it would be close to 0-1

45... d3! 46. g2 f5 47. e8+ g7 48. e1 d7

#### 49. ♖b8

If 49. ♖b8 ♗e6 50. ♕d2 ♜e3 wins  
49... ♗a7 50. ♖g8+ ♜h6 51. ♖b4 ♕c4 52. ♜h1

There was nothing better, it is played because White won't now be in check after Black's next

52... ♗xd4 53. ♖b2 g5 54. ♖e8 ♖a6?!

Hiarcs appears to be 'fiddling around' – i.e. struggling to find a winning tactic! 54... ♖a7 would have left the rook with more scope to centralise or get to the kingside

55. ♖e7 ♜e5 56. ♖f2 ♜g6 57. ♖d2 ♜d3

#### 58. ♖xd3?!

Perhaps the best chance was to try and avoid a loss or exchange of pieces and let Hiarcs continue in its struggle to find a breakthrough method.

So 58. ♜d1 ♖xa4 59. ♖e8. But I'd expect 59... ♖a1 60. ♕f1 ♖xd1 61. ♖xd1 ♜f2+ 62. ♕xf2 ♗xd1 63. ♖e1 ♗d2 to be within Hiarcs abilities and this would certainly result in a 0-1 even though it would have made the game longer. Now Hiarcs is able to finish the game and match sharply.

58... ♗xd3 59. ♖e8 c5 60. ♜e2 ♖a8!

A neat sacrificial offer simplifies the finish  
61. ♕f1

If 61. ♖xa8? ♗xe2 finishes it  
61... ♗f5 62. ♕h3

Sacrificing to delay mate

#### 62... ♗xh3

Mate follows, both engines know it:

63. ♜g1 ♗f1 64. ♖e3 d4 65. ♖e5 ♖e8 66. h4  
♖xe5 67. ♜h2 ♖xe1 68. h5+ ♜xh5 69. g4+  
♜xg4 70. ♜f3 ♗h1# 0-1

|             | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |    |
|-------------|---|---|---|---|---|---|---|---|---|----|----|
| HIARCS 13.3 | 1 | 1 | 0 | ½ | 1 | 1 | 1 | 1 | 1 | 1  | 8½ |
| RYBK 2.2    | 0 | 0 | 1 | ½ | 0 | 0 | 0 | 0 | 0 | 0  | 1½ |

Mark Uniacke quickly e-mailed his appreciation: "Thanks for running this match Steve. A very nice start for Hiarcs on its first dedicated computer!"

"It is also particularly interesting because of the varied openings, and the way Hiarcs dominated the Rybka2.2 version both positionally and tactically in all game phases. I don't think the opening book was a deciding factor in any game.

"Way back in 1993 Saitek had the opportunity to have the Hiarcs engine at that time in their Sparc module - it had just won the World Microcomputer Championship in Munich on a Sparc processor, and would have made a very strong program back then for a dedicated computer. Perhaps it would have slowed down the rush to get everything onto PCs?! Unfortunately Saitek decided to go with something else, a great pity!"

# THE EIGENMANN ENDGAME TEST SUITE

Peter Grayson kindly brought the **Eigenmann Endgame Suite** to my attention recently, and it contains some interesting positions, some of which are quite tough!

There are 100 Positions in the Test, and the top scorer on my Quad Laptop, 1 minute for each position, was Houdini2 Pro which got 87 correct.

Houdini scored an amazing 95 on Peter's extremely fast hardware where the engines were also allowed 4 minutes for each position. But going through the positions I found a small number where the engines having found the right move still hadn't got a correct evaluation quite a bit later in the line, so maybe they got one or two more by luck than good management?!

We'll perhaps have a look at some of these debatable positions in a later issue, and see if we can sort out what's going on, but for this time I'm going to give you some of the clearer ones to have a look at!

First let me extend the results from my Quad Laptop, 1 minute per position, all engines running as 64-bit except as shown:

87 Houdini2 Pro  
 85 Rybka 4.1 SSE42  
 79 Naum 4.2  
 78 Stockfish 2.1.1 (no tablebases!)  
 78 Critter 1.2  
 78 Zappa Mexico 2  
 73 Shredder 12  
 69 Hiarcs 13 32-bit  
 65 Junior 12.5  
 55 Fritz 12 32-bit

Okay, here we go. I know some readers will fancy having a go at these on their own, or side-by-side with their PC, so I've put a basic Hint for each position, but I've put it underneath the Diagram. Therefore you can start working on the position without any assistance and also set your PC up, but if you get stuck and want a bit of help, then my hint might point you in the right direction!

## Eigenmann 13

Salov 1998

White to play and win

[Hint: A fairly easy one to start with, but there's a couple of capture opportunities you must avoid making]

## Eigenmann 15

Kasparian 1997

White to play and win

[Hint: Another one where there's a capture you must avoid. Rather unusually when you're trying to win you also need to be heading for opposite coloured bishops!]

### Eigenmann 21

Galitzky 1902. White to play and draw

[Hint: Quite a few of the positions involve the offer of a sacrifice at some point. Most engines get this, Hiarcs, Shredder and Stockfish are very quick!]

### Eigenmann 26

Queckenstadt 1920. White to play and win

[I think the first 2 moves are quite hard to find, but the key is the diagonal needed for supporting or stopping the queening]

### Eigenmann 33

Kubbel 1925. White to play and win

[Hint: The win uses the threat of Nc3+ on more than one occasion]

### Eigenmann 37

Pogosiants 1977. White to play and win

[Hint: I hope you know how to win the N+B ending, because that's where you have to get to in order to win this one! Houdini and Critter are fast, Rybka slow, and some fail even in 5 mins]

### Eigenmann 43

Zappa-Jonny, CompGame 2006  
White to play and draw

[Hint: Your choice should be Ng3 or Nf2, but only one of these moves gets the draw]

### Eigenmann 44

Kallstrom 1969. White to play and win

[Hint: You'd like to play 1.d7 but the fork Nc5+ seems to stop it. So how do you win?!]

# SELECTIVE SEARCH - 15 YEARS AGO!

In issue 154 we went back 10 years to 2001, and I had enough signs of interest to indicate it would be something worth doing again. So this time I am going back **15 years** to 1996 and, early next year I will see if I can find enough old issues to go back 20 years!

## Selective Search 1996

- **Selective Search** was usually a 28 page issue, and had no photographs. The cover cost was £3.50 per issue and I had over 300 subscribers!
- Richard LANG's **Genius4** for Windows PC had just come out in time for Christmas 1995, as did Marty HIRSCH's **M Chess Pro5** and Mark UNIACKE's **Hiarcs4**. They all cost £89 each! Hiarcs also became available for the MAC!
- In New Zealand 4 PC engines played against 4 Club players with an average rating of 2296 Elo. The PC engines were on 486 computers, **Genius4** and **MChessPro4** each scored 3½/4, **Rebel6** scored 1½/4 and **Hiarcs3** got 1/4.
- **The King** won the Open Dutch tournament with 9/11, ahead of **Kallisto** with 8½, **Quest-Fritz** and **Arthur** with 8, and **Zarkov** with 7½.
- **Phil GOSLING** was running a Mephisto VANCOUVER 68020 in a BCCS Correspondence tournament. It was doing very well and, after dropping to 2446 Elo and out of the top 10 BCCS ratings for the first time, had just climbed back to 2461 and 9th when good friend Phil, always cheerful despite his ill health, sadly died.
- **Genius3** and **MChessPro5** came 1= in the WORLD MICRO COMPUTER CHAMPS with 8/11, **Ferret**, **Nimzo3** and **Virtual Chess** were next with 7½, **Dark Thought**, **Hiarcs**, **The King** and **Quest-Fritz** got 7. Amongst others were **Gandalf** (6½), **Junior** (6½), **Kallisto** (6½), **Shredder** (6), **Comet** (5) and **Chess System Tal** (4½). A dedicated computer was also entered... the Mephisto Montreux, and it scored a very creditable 5/11!
- **Fritz4** on a 150MHz Pentium PC (wow!) played a match against **Gary Kasparov**. Over-the-top Ray Keene described it as the 'MAN v MACHINE World Championship'. They only played 2 games and ChessBase's operator Matthias FEIST entered one of Kasparov's moves incorrectly in the first which cost Fritz the point as the match

referee insisted that the same response as to this 'wrong' move still had to be played after Kasparov's move had been corrected. In the second Kasparov had connected passed pawns in the ending, but with opposite coloured bishops. In fact he over-pressed but was able to hold the draw for a 1½-½ win.

- The 6th HARVARD CUP was held, **Computers v** (mostly) **GMs**. I had listed previous scores in a 1996 issue which are worth repeating here:
  - ♦ 1989 Comps 1½ - GMs 14½
  - ♦ 1991 Comps 4 - GMs 12
  - ♦ 1992 Comps 7 - GMs 18
- Up to here it had been a 50/50 mixture of Dedicated Computers and PC Engines, but by 1991 the majority of the computer entries were PC engines.
  - ♦ 1993 Comps 9 - GMs 27
  - ♦ 1994 Comps 18½ - GMs 29½
- As the time control was G/25 and the PC hardware was getting faster by the year (P60 in 1993, P90 in 1994, but to be P133 in 1996), there was some hope that the Computers might get close to drawing the 1996 match, but it was not to be!
  - ♦ 1996 Comps 12½- GMs 23½
- Virtua Chess got 3½/6, MChess Pro 2½, Chess-Master 4000 got 3, WChess got 1½/6, and Junior and Socrates scored just 1 each.
- We at COUNTRYWIDE COMPUTERS entered a **Kasparov/Saitek GK2100** in the Bury St Edmunds tournament, where it scored a creditable 3/5 for an 1815 Elo rating.
- British GM **Nigel SHORT** easily beat **MChess Pro5** on a P133 by 2-0. In their first game he used the Trompovsky Attack to win in just 31 moves!
- FREE PC Chess Software was beginning to appear on the Internet. One of the first was **Rebel Decade**, a reduced strength version of Ed SCHRODER's **Rebel 7**.
- The World Heavyweight Chess Championship took place, a 6 game Match between **Gary Kasparov v Deep Blue**! Kasparov lost game 1 in only 37 moves - "Is the game up for Kasparov?", asked GM David Norwood in the Daily Telegraph. "Not yet," was Kasparov's clear reply as he won games 2, 5 and 6. It seemed the more games they played the more Kasparov was able

to recognise and take advantage of computer weaknesses. An April Fool joke announced that the whole Deep Blue team had been sacked as a result, but main programmer Feng-Hsiung HSU later assured us this was not true! An assertion that "*Humans still rule!*" appeared in one match report, but another writer neatly asked "*How many humans still rule?!*"

- Richard LANG announced the **London** upgrade for owners of **Mephisto** Modular, Exclusive and Munchen boards. It was to have 3 playing styles and users would be able to adjust pawn and piece values! It was expected to be between 30-40 Elo stronger than its predecessor, the Genius engine. A couple of months after this **Mephisto** then announced a new **MM6** module for their boards, and the press-sensory **Milano Pro** and **Atlanta**, all by Franz Morsch! Happy days!
- The **11th. Aegon Tournament** between Computers and Humans saw Yasser SEIRAWAN score 6/6! John van der Wiel and Rafael Vaganian got 5½/6, while Jonathan Speelman scored 5/6. The top PC engines were **Quest**, **Nimzo**, **Now**, **Capture** and **Rebel7** with 4½/6, while **Rebel Aegon**, **Zarkov4**, **MChess Pro**, **The King**, **Hiarcs**, **Kallisto**, **Diep** and **WChess** scored 4/6. There were also some Dedicated computers playing: The Tasc **R30** and Mephisto **Genius 68030** scored 4/6, very creditable! And a Saitek **Brute Force** scored 3½, the Mephisto **Berlin Pro** got 3, and the Novag **Diamond** 2½.
- Rumours abounded of Bobby FISHER re-emerging in Argentina with comprehensive rules for his 'new' **Shuffle Chess**. It was not quite new in truth, *SeI Search50* had covered Jon SPEELMAN beating **Fritz** by 2-0 in a Shuffle Chess type match.
- Larry KAUFMAN announced the end of his annual production of the popular **Computer Chess Reports**, and the Austrian magazine **Modul** also closed down. Long live *Selective Search*!
- A new idea emerged as playing on the INTERNET was becoming more and more attractive: **Karpov v The World**! Anyone with access could send in their moves. After each of Karpov's moves we all had 7 minutes to send in our choice. **Telecom**, Finland's Internet server, sorted out the most popular reply. We made an immediate mistake by opening with 1.e4. Even Kasparov had given up using this against Karpov

because he couldn't beat Karpov's Caro Kann. Inevitably the reply was indeed 1...c6 and it was all downhill from there. We lasted 32 moves.

- We ran the **LCT II Test** in *issue* 65, a suite of 35 positions, 14 Positional, 12 Tactical and 9 Endgame. In *issue* 66 I was able to show the results for a combination of 16 Dedicated computers and lots of PC engines on various Pentium Pro, Pentium and 486 hardware. There were 47 PC results making 63 results in total. What a wonderful response! For the record the top scores were:

- **Dedicated**

|                          |      |
|--------------------------|------|
| ♦ Tasc R30 1995          | 2435 |
| ♦ Kasparov Risc 2500     | 2320 |
| ♦ Mephisto Montreux      | 2315 |
| ♦ Mephisto Genius 68030  | 2285 |
| ♦ Mephisto Berlin Pro    | 2245 |
| ♦ Novag Sapphire/Diamond | 2230 |

- **Pentium 90MHz**

|           |      |
|-----------|------|
| ♦ Hiarcs3 | 2520 |
| ♦ Hiarcs4 | 2505 |
| ♦ Genius3 | 2505 |
| ♦ Genius4 | 2495 |
| ♦ Genius2 | 2490 |
| ♦ Rebel6  | 2485 |
| ♦ Rebel7  | 2480 |
| ♦ Fritz4  | 2465 |

- The **1996 World Micro Chess Computer Championship** was held in **Jakarta**, Indonesia. This created a major problem as there was a £700 entry fee and many programmers would need to pay between £2,000-£2,500 for air travel and hotel expenses to attend. They also had to get their own PC there! However the entry list was good! Some of the pre-Tourney rankings were interesting: 1 Fritz, 2 Ferret, 3 Nimzo, 4 Virtua... 6 Crafty, 7 Junior, 8 Gandalf... 10 Shredder. 28 played altogether and the rankings were soon in disarray - after 6 rounds 10th ranked **Shredder** was already leading on 5½! The FINAL scores were **Shredder** 9/11. **Ferret** 8½, **Nimzo3** 7½. Others included: Crafty 7, Fritz and Virtua 6½, Gandalf and Francesca 6, Woodpusher 5½, Pandix 5. '*Where is Junior*', you ask! Sadly they were unable to enter Indonesia. It was announced as '*for political reasons*', but really was another sad example of anti-Semitism.
- That's it for 1996 - on the next page I have printed a copy of a typical front cover, and parts of both the Dedicated and PC Rating Lists as they appeared in *issue* 62, Mar-Apr 1996.

# THE 2011 WORLD COMPUTER CHAMPIONSHIPS!

I DELAYED sending this issue to my printers so as to include the **RESULTS** from the **WORLD COMPUTER CHAMPIONSHIPS**.

As HIARCS has done particularly well, I am very glad that I did! Most folk will know that I've been involved for many years in Opening Book preparation and testing for Mark Uniacke's Hiarcs engine.

## The WORLD CHAMPIONSHIP

In the **World Championship** Hiarcs started with 2½/3 and had an early lead. But then it suffered too many draws which allowed Shredder to catch it, and then **Junior** to overtake it near the end. Pandix suffered an amazing 11 move loss in round 7, due to an engine bug of some sort!

Congratulations to **Amir Ban** and **Shay Bushinsky**, Junior's popular programmers!

| Pos | Program    | /8 |
|-----|------------|----|
| 1   | JUNIOR     | 6  |
| 2=  | HIARCS     | 5½ |
|     | SHREDDER   |    |
| 4=  | PANDIX     | 5  |
|     | JONNY      |    |
| 6   | THE BARON  | 4½ |
| 7   | BOOOT      | 3  |
| 8   | ROOKIE 3.4 | 1½ |
| 9   | WOODPUSHER | 0  |

I think there were more draws and difficult games than ever this time - as the engines get better and the hardware faster, so then winning games is not at all easy. Even the aggressive Junior's 1st. place came from 4 wins and 4 draws!

## The WORLD SOFTWARE CHAMPIONSHIP

In the **World Computer Software Championship** (the engines play on equal hardware) Hiarcs again took an early lead but just couldn't beat

Pandix from a good-looking position in the penultimate round. So it found itself level with Junior again! Now we had to beat Shredder and hope that Jonny could hold Junior!

### Hiarcs - Shredder

B42: Sicilian, Kan Variation

1.e4 c5 2.♟f3 e6 3.d4 cxd4  
4.♟xd4 a6 5.♟d3 ♟f6 6.0-0 ♟c7  
7.♟e2 d6 8.c4 g6 9.♟c3 ♟g7  
10.♟d1 0-0 11.♟f3 ♟c6 12.h3  
♟d7 13.♟e3 ♟xc3 14.bxc3 f6  
15.♟ab1 ♟c5 16.♟xc5 dxc5

The Book preparation has got us the sort of position we wanted, active with complications! Now it's up to Hiarcs 17.e5!?

This forces Shredder to decide between ♟xe5 or f5 17...f5 If 17...♟xe5! 18.♟xe5 ♟xe5 19.♟xe5 fxe5 20.♟e4 with better drawing chances for Black 18.h4! ♟d8 19.♟g5! h6 20.♟h3 ♟f7 21.♟e1 ♟h7 22.♟f4

A critical moment, and I think Shredder now makes a mistake by committing its queen too far over to the queenside 22...♟a5?

23.g4! ♟g8 24.h5 gxh5 25.♟xh5 ♟h8 26.♟f6 ♟g6 27.f4! A marvellous all-out attack, sacrificing the c3-pawn and risking everything. It's exactly what we'd have wanted Hiarcs to do! 27...♟xc3 28.♟e3 ♟a3 29.♟b3 ♟a5 30.♟e2 ♟g7 31.♟f1 ♟d8 32.♟xc5 ♟d7 33.♟xb7 ♟c8 34.♟b6!

Hiarcs is in the happy position of having a great attack and, if Shredder exchanges to simplify things, a material advantage and pressure with it! Also news came through... Junior has drawn! 34...♟c6 If 34...♟xb6 35.♟xb6 ♟e8 36.♟xe6 wins easily 35.♟xd8+ ♟xd8 36.♟xg7 ♟xg7 37.gxf5 ♟b8 38.♟d2 ♟f7 39.♟c2! exf5 Shredder can't survive. If 39...♟b7 40.♟e4! wins. If 39...♟e7 40.fxe6 ♟xe6 41.♟d6 wins 40.♟d6 ♟e7 41.♟g8+ ♟f8 After 42.♟xh6 it seems ♟e4 is best, but 43.♟xe4 fxe4 44.♟f5 a5 45.e6 wins comfortably. 1-0

| Pos | Program  | /8 |
|-----|----------|----|
| 1   | HIARCS   | 5½ |
| 2   | JUNIOR   | 5  |
| 3   | PANDIX   | 3½ |
| 4=  | JONNY    | 3  |
|     | SHREDDER |    |

There will be more on the **World Championships** next time, with games, analysis, round by round reports, Hans' (in)famous Journal, and photos of course. Don't miss it!

# THE CCRL AND CEGT RATING LISTS!

The very interesting **CCRL & CEGT Website Groups** have **COMPLETE RATING LISTS** for a wide range of PC hardware, and include old, new, interim and free versions, though they don't always both test exactly the SAME engines! I extract from the lists their ratings for engines when they're running on a *Single Processors*.
